North Memorial Family Medicine Residency Program prepares residents for full-spectrum practice in rural or urban settings by combining community-focused clinical training with a high intensity, full spectrum hospital experience. It is ACGME accredited with Osteopathic Recognition.

The clinic is a Certified Health Care Home that has been an anchor in the North Minneapolis community for more than 40 years. The hospital is a primary care focused tertiary center with a Level I Trauma Center.

Community outreach, understanding the social determinants of health, health policy, and advocacy are integral parts of the North Memorial residency experience.

What Our Residents Say:

“I chose North Memorial because of the focus on underserved populations and community health and diversity of faculty strengths. I loved the culture of the program: the support, community and energy.”

“North Memorial helped me achieve my goal of getting into a sports medicine fellowship and provided a foundation for my future practice.”
CURRICULUM
> Longitudinal educational options, including underserved medicine, global health, sports medicine, research, osteopathic medicine, comprehensive reproductive health training, addiction care, and procedures
> High volume inpatient family medicine, including an open ICU and hospice
